

Which is the best industrial energy storage cabinet in Greece

Overview

What is the future of battery storage in Greece?

Overall, following last months public consultation, the Greek ministry of the environment and energy presented a bolder and even more ambitious battery storage program, allowing for longer completion times but retaining the financial and competition guarantees in place.

Is Greece preparing a new 3.5 GW energy storage program?

A decision published by Greece's Ministry of the Environment and Energy in the State Gazette last Friday was a surprise for the domestic energy storage sector. The ministry ran a public consultation in late February, proposing a new 3.5 GW energy storage program.

How many GW of battery energy storage will be installed?

However, its final decision is targeting a total of 4.7 GW of new utility-scale, front-of-the-meter, standalone battery energy storage projects. Of this capacity, 3.8 GW of batteries will link to the transmission network and 900 MW of capacity will be installed on the distribution network.
