Overview

Does Timor-Leste need a roof-top solar energy system?

In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators. Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Why is solar energy maintenance important in Timor-Leste?

Maintenance tends to be limited to repairing malfunctioning system components, instead of preventative care or servicing, which can reduce the effectiveness of solar energy systems and increase costs. Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Why is Timor-Leste not able to finance solar panels?

MDF research found that lenders in Timor-Leste are unwilling to lend to small and medium sized enterprises due to levels of default, perceived risks, and the difficulty of securing collateral. Evaluate the upfront costs of installing solar panels versus long-term savings. Consider financing options to determine overall economic viability.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years.

Transitioning to solar can also help the country meet environmental commitments.

Why do businesses need solar power?

Unreliable grid supply means that businesses and essential service providers require a diesel generator, which has high upfront and running costs and contributes to GHG emissions. Solar provides an environmentally-friendly alternative that can provide uninterrupted supply during the day without battery back-up.

Which solar photovoltaic panel manufacturer is best in East Timor

[Latest and best solar panels Timor-Leste](#)

About 20,000 people living in rural and remote parts of Indonesia and Timor-Leste will gain access to clean electricity and clean water from solar power as a result of a US\$ 18 million ...
