

Zambia Solar Water Pump Inverter Wholesale

 **TAX FREE**    

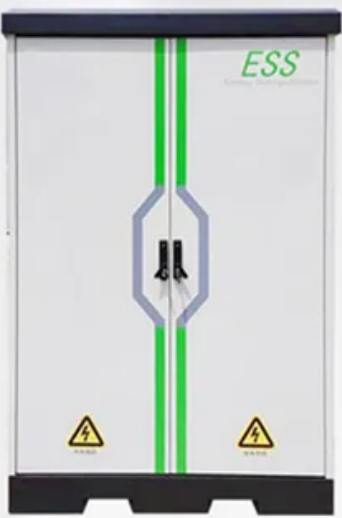

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

The diagram shows a tall, grey Energy Storage System (ESS) unit. It features two vertical green lines running down the center. In the middle, there is a blue hexagonal shape with a black lightning bolt symbol. At the top right, the letters 'ESS' are written in green. At the bottom, there are two yellow warning triangles with black lightning bolts, one on each side of the central green lines.

Overview

Where to buy solar submersible pumps in Zambia?

With a consistent focus on technological innovation, PowerBack Energy Solutions is a major supplier of a wide selection of high quality solar submersible pumps in Zambia. They can operate directly off solar panels, batteries or a combination of the two. Their experienced sales team are available to help you select what best suits your needs.

Why should you choose a solar pump system in Zambia?

Zambia has one of the biggest water resources in Sub-Saharan Africa and our solar pump systems will enable you to access those resources at any place. Either for residential use, irrigation of farm land or industrial applications, solar pumps will ensure an independent water supply at your location.

Why should you invest in a photovoltaic system in Zambia?

Zambia provides optimal conditions for photovoltaic (PV) with average irradiation rates of 5.5 kWh/m². To harvest that huge source of energy we provide a wide range of photovoltaic solutions for the residential, business and social sector. In general, PV systems can be divided into on-grid and off-grid systems.

Do solar pumps need an inverter?

Solar pumps do not need an inverter as they can operate by direct current (DC). Our service includes panel stands which we produce according to your requirements. That will make sure that the system works safely and is protected against thievery. Our services include the supply of a wide range of energy efficient Light-emitting diodes (LEDs).

Why do you need a split unit system in Zambia?

Split-unit systems are ideal solutions for the tourism and social sector as well as bigger apartment buildings. Load shedding is a constant problem in Zambia

which can cause devastating revenue losses. Our backup systems will help you to be prepared in case of power outages.

Can a solar inverter be used for electronic devices?

The AC power can then be used by any electronic device. Our PV solutions combine the solar array and the inverter with a battery bank and/ or a diesel generator. Batteries enable the systems to store solar power and utilize it even at night time.
